Story - Boarding for fitness tracking

A boy wants to be fit. He ponders in head(makes a cloud of thought) about being fit.

Next week, on his birthday, his mom gifts him a FitBit

He is confused about what to do with it. He doesn't know about its features and proper use.

Next day, he wears the FitBit and goes jogging.

He comes back and realizes he can view the: distance he ran, calories burnt, Monitor and track heart rate.

He is elated and realizes how he can use it to meet his health and fitness goals.

Next picture, he is in better shape and he is very happy while looking at this FitBit.

Story boarding for heartbeat detector

An old when consulted a doctor got to know that he is diagnosed with a heart disease

His grandson gave him a heart rate monitoring device for any emergencies

The device used to monitor heart rate and send regular updates to his grandson

Suddenly after 1 month heart rate of the old man deviates from the normal range and the device sent sos messages to all the listed devices

Grandson rushed to the oldman and immediately took him to a nearby hospital in an ambulance
